Licensed for Extraction processing facility

WHY JAMAICA?

LOW COST

High quality production

MEDICALLY SUPERVISED TRIALS

Ability to conduct medically supervised trials

3.5 OUTDOOR

Growing cycles per year

FINANCIAL SUMMARY

Use of Funds

Expansion of clinical trials

Production of 3D Printers

Acceleration of Retail Products and marketing

Increasing Cultivation of Cannabis Strains

Product Development Pipeline

Overhead Costs

General Working Capital

FIVE KEY REVENUE SOURCES

1. Open global treatment facilities
2. Patient's treated at Jamaican international treatment facility
3. Legal export of Apollon oils and products
4. Formulation I.P. and 3D printer, licensing and royalties
5. Apollon product production via 3D printer partners

CLINICAL R&D

GLOBAL CENTRE OF EXCELLENCE FOR MEDICAL CANNABIS
THERAPY - NEGRIL, JAMAICA

DOC'S PLACE INTERNATIONAL

- Established in 2015 for in-patient medical cannabis treatment
- Approved by the SRC and the Ministry of Science, Energy and Technology
- Plans to expand via purchase of second clinic
- Plans to secure additional dispensary locations and seek international export markets
- Partnered with Apollon to run medically supervised trials

CULTIVATION, PROCESSING & PRODUCTS

CULTIVATION

- Established the Apollon Cannabis Collective, a commercial platform to facilitate and engage local farmers to grow medical cannabis crop for processing
- Expansion expected Q1 with five acres fully approved Tier 3 cultivation facility identified
- Will allow Apollon to grow approximately 1600 pounds of medical cannabis flower per acre per year

PROCESSING & EXTRACTION

- State-of-the-Art Processing Lab in Negril, Jamaica has a current capacity of producing approximately 15kg of the highest quality full-spectrum medical cannabis oil per day
- The laboratory also manufactures Apollon's retail medical cannabis pharmaceuticals

MEDICALLY SUPERVISED TRIALS

Apollon's Research and Development (Experimental) License allows Apollon Jamaica to perform medically supervised trials overseen by the Ministry of Health in addition to the medical team at Doc's Place Wellness Centre

ARTIFICIAL INTELLIGENCE

Apollon uses State-of-the art medical AI technology to create a full line of patient specific medicines by determining the best combinations of cannabinoids to target and optimize treatment of diseases

3D PATENTED PRINTER

Apollon's 3Dispensary™ was designed to overcome import/export regulations on cannabinoids and THC.

Apollon formulation medicines can be printed 'in house' using bio ink ensuring consistency. Specific formulation 'recipes' can be emailed over to a printer

PRODUCTS

Many of these formulations were created using Apollon's proprietary artificial intelligence techniques and include:

- Apollon NAUSEA™
- Apollon PAIN™
- Apollon SLEEP™
- Apollon ANTI-INFLAMMATORY™
- Apollon SEIZURES™
- Apollon APPETITE™
- Apollon CANCER™ (APM™) – High Times Cannabis Cup 1 st Place Winner
